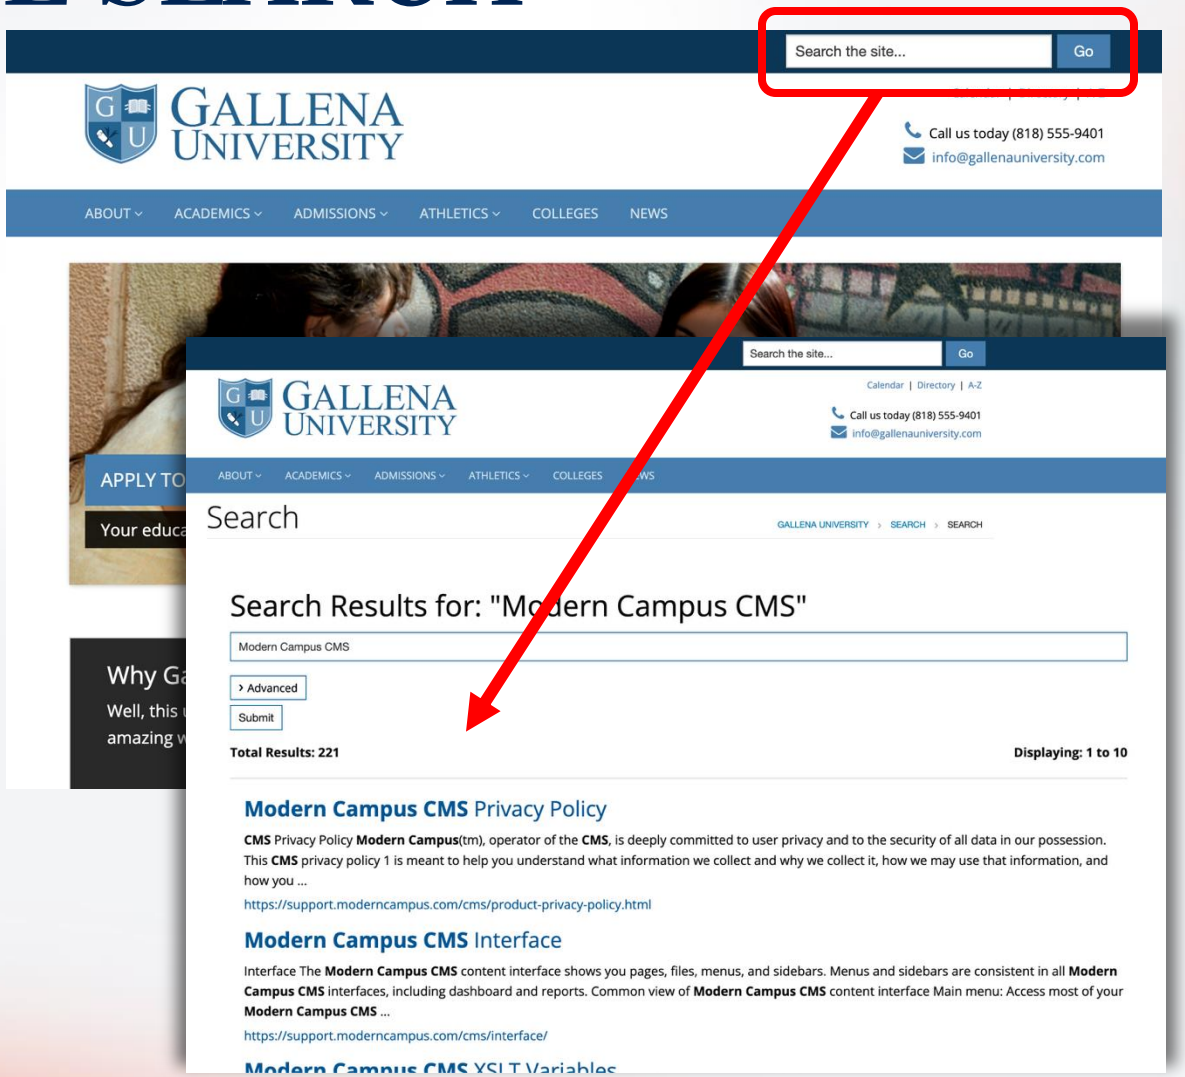
# WHAT IS CMS WEBSITE SEARCH

CMS Website Search provides a search engine for your live site for web visitors to use.

4 Search result pages are styled to match your website, and you can control the search function through an admin panel to exclude or promote pages and results.



# WHAT DOES PARAMETRIC MEAN

## Jordan's Parametric Paraphrase:

*The parametric approach used by CMS Website Search is a technique that uses algorithms to create a complex and customized search index that is a result of various parameters set by the Admin for the algorithms to follow.*
